Android Developer with hands-on experience building production apps from scratch. As the sole Android developer in a startup, I shipped two apps (mobile + TV) to Google Play. Passionate about clean architecture, modern UI with Jetpack Compose, and writing maintainable Kotlin code.

EXPERIENCE

Android Developer at [PushkaVPN](#) (Saratov, Russia) Aug 2025 – Present

- Built and shipped Android [mobile](#) and [TV](#) applications from scratch – published to Google Play.
- Implemented all app screens in Jetpack Compose.
- Developed WireGuard tunnel connection logic.
- Integrated Firebase notifications and company API endpoints.
- Structured the codebase into three modules: mobile, TV, and core.
- Applied MVVM architecture and Kotlin coroutines.
- Implemented app navigation and prepared releases for Google Play.

TECHNICAL HIGHLIGHTS

- Kotlin. Experience with Python and C. Basic reading knowledge of Java.
- Jetpack Compose, Hilt, Coroutines, Retrofit, Firebase, Room, WireGuard.

OPEN-SOURCE PROJECTS

- [Skye](#) – weather forecasting app for Android. Ongoing personal project focused on clean UI and modern app architecture.

EDUCATION

Bachelor's degree in Programming Technologies at [Saratov State University](#), 2026.

Master's degree in Programming Technologies at [Saratov State University](#), 2028.
